

# Screenshotbot

BUILD PIXEL PERFECT APPS

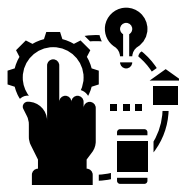

## ABOUT US

Screenshotbot is an Automated UI testing platform for android and iOS developers, built to improve the efficiency of your application development and QA process so that you build pixel perfect apps every time

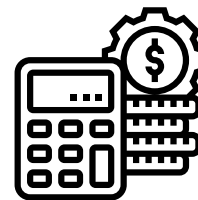

### AUTOMATED UI TESTING

Our automated UI testing process is built to solve problems that developers and QA testers face

### INTEGRATIONS

We integrate with various CI Tools and Project Management tools making it an easy to use solution across industries

### COST EFFECTIVE

Reduce the workload of your QA testers and let the original author confirm any changes. Saving you time and money

## START YOUR 90 DAYS TRIAL PERIOD

The backbone of Screenshotbot is used in various organizations across the globe enabling them to deliver pixel perfect apps. We want to integrate the same process at your organization
